# **QuickBooks® Essentials Training**

We Fail to Focus on the 20% of our Business that Generates 80% of the Results.

The 80/20 rule is a universal truth in all businesses that we have worked with or owned.

For example: 20% of our customers generate 80% of our net profit. At the same time 20% of the goods or services we sell contribute 80% of our revenue and 2 out of 10 of our staff create 80% of the value our customers receive.

The most important value good bookkeeping brings to a business is an understanding of where your 20% is hidden.

By generating daily reports that uncover the best customers, jobs, services, or products, you will soon see how you can refocus your internal efforts on doing more good work.

This is the great contribution a company receives from good QuickBooks<sup>®</sup> data and from using QuickBooks<sup>®</sup> the 'right-way'.

## **5 Minute Books**

### 5 Minute Books: 5 key reports and how to use them.

1. Daily profit and loss. By reviewing today's profits, you will soon find that on the days you had the most fun, you also made the most money. We are looking to focus our limited resources and energy on those efforts that we enjoy and that have the biggest impact on our bottom line.

2. Sales reports by product or customer. The sales report by customer should be indexed by profit and gross revenue. In many cases, we learn that the customers who spend the most with us are not necessarily the ones that drive the most net profit. You will also learn that some customers that are not fun are also not making you much money. Bad customers should be sent to your worst competitor as a gift.

**3.** Accounts receivable. The most common cause of cash flow problems is a failure to keep collections under control. A daily review prevents collections-related surprises, which often surface when it's too late to do anything about them.

**4.** Accounts payable. If we know exactly what is expected of us in the next 30 days, we are more likely to accomplish the goal. A clear understanding of your obligations will help you sleep at night, as well as plan for the timely repayment of your vendors and creditors.

**5. Cash on hand.** Profit can be an opinion but cash is always a fact. Each day you must know exactly how much cash is available. This one step alone will drive you towards a bigger bank account.

# **5 Minute Books**

Now that our company data file is set up and we understand the importance of reporting we need to make a few decisions. What will we do next?

**Business Tip:** Create a decision making process using the information from the Five Minute Books reports as a starting point. A set process for making informed decisions is a key step towards running a better business using the following steps;

- ✓ Decide where you want to go (How much is enough?) Establish clearly defined goals.
- ✓ Find out exactly where you stand today as a base point for improvement.
- ✓ Determine the course of action that will best help you achieve those goals.
- ✓ Act with a sense of urgency and establish timelines.
- ✓ Measure progress, adjust to errors and get back on track when necessary.

Customizing and viewing reports on a regular basis is key to ensure the accuracy of your company data, improve your cash flow and help you to make better management decisions.

The **Memorized Reports** list allows you to save custom reports in groups and streamline the time it takes to review reports daily, weekly, monthly etc.

Click Reports from the Menu Bar.

Click Memorized Reports.

Click Memorized Report List.

Note: All new company data files will

have a pre-existing Memorized

Report List.

### **Profit & Loss**

The **Profit & Loss** report is an accumulation of income and expense for a period of time. At the end of each year the net profit or loss rolls into the equity section of the Balance Sheet. Each new year starts with a zero balance for income and expenses.

Click Reports from the Menu Bar.

Notice the Ribbon Bar options for processing reports. Print, Email, Expand/Collapse,

Refresh, etc. Click Customize Report.

# **My Custom Reports**

### **Fraud Prevention**

Fraud prevention is a growing topic. Many business owners have experienced this first hand. Implementing policies, processes and procedures can help detect and prevent fraudulent activity.

### Biz Q&A:

- Would you like to prevent fraud from occurring in your business?
- Would you like to identify areas where the likelihood of fraud is the greatest?
- Would you like to protect your business assets and cash?
- Did you know that businesses with strong internal controls in place have more accurate financial statements?

### **PIP Wow Fact:**

According to the Association of Certified Fraud Examiners, the average business will lose approximately 7% of revenues due to employee theft. Small businesses have a 38% greater amount of fraud than larger companies.

Let's view and save an Audit Trail in My Customized Reports.

#### Audit Trail

The Audit Trail report is a great way to view activity by user. This is a great training tool used to enforce accurate data entry. The Audit Trail is also a way to enforce an accountability policy for all users.

Click Reports from the Menu Bar.

#### Click Accountant & Taxes -> Audit Trail.

The Audit Trail report displays the **Dates Entered/Last Modified** date and time, Last Modified By, State, Original Transaction Date, Name, detailed transaction information and other useful information.

Use the Ribbon Bar to modify the date range, add a comment, customize, print etc...

Click Memorize to save the Audit Trail in your memorized report list group.

# Speed is Critical to Positive Cash Flow

**Business Tip:** Cash flow includes all transactions that go in and out of your bank accounts. Some transactions will post to the Balance Sheet and some will post to the Profit & Loss.

# Speed is Critical to Positive Cash Flow

## **Speed is Critical**

### Your 4 biggest expenses in business...

Interest Insurance Taxes Payroll

They keep adding up every second. It is critical to accomplish the 'finisher' work ASAP in order to keep the business cycle moving *FAST*.

1<sup>st</sup> Your goal is to accomplish your task accurately – while delivering usable information that will direct the business towards better cash flow and higher profit margins.

2<sup>nd</sup> Your goal is to spend as little time as possible on clerical details that do not add to your customers' experience with your firm.

3<sup>rd</sup> Your goal is to assist the manager in isolating the 20% of your daily operations that drive 80% of your net profit to the bottom line. This includes identifying production bottle necks that slow the cycle.

By using Notes, To-Dos, Lists and Custom Fields, you will reduce the time it takes to complete the bookkeeping function.
